GENERAL INFORMATION

This Ford Chassis Parts and Accessories Catalogue has been prepared to assist Dealers and Garages in ordering Ford Parts—Parts that are "Right" for Ford cars and trucks.

This catalogue includes all FORD PASSENGER CAR MODELS 1928 through 1948 inclusive and FORD TRUCK MODELS 1928 thru 1947 inclusive.

Model identification information is listed starting with page 744. Also, a complete alphabetical index has been included.

For rapid identification of parts for minor assemblies, such as, oil pumps, fuel pumps, distributors, generators, etc., numerous charts of these assemblies have been catalogued. When referring to these charts it is essential to first determine which assembly is applicable for the desired year, then refer to the chart and select the part or parts wanted, for example:

A DISTRIBUTOR ROTOR is required for a 1941 Passenger Model with an 8 cylinder engine. Refer to the Distributor assembly (basic part number 12127) page 512 and note the complete part number of the Distributor assembly is 11A 12127. Page 519 of the Distributor Chart lists 68 12201 Distributor Rotor as the wanted part.

The following models are listed in the model column:

Pass (Passenger), Comm (Commercial or light truck), Truck, C.O.E. (Cab-Over-Engine)

Attaching parts such as bolts, screws, clamps, etc. are listed below the part with which they are used. All standard bolts, screws, etc. are listed numerically on page 668 and by size on page 676. Special bolts, washers, etc. are listed numerically on page 672.

The driver's side is the LEFT HAND SIDE of the vehicle and governs such parts as fenders, lamps, etc. as to whether a part is right or left hand.

For Ford Chassis parts required for later models, refer to—

Form 3752, For 1949-51 Passenger Car Models

Form 3749, For 1948-51 Truck Models

For Body parts such as seats, door handles, window glass, window regulators, etc., refer to—

Form 3605, 1944-51 Body Parts Catalogue

Following symbols are used throughout this catalogue:

† Part is no longer supplied for service.

Ⓔ Indicates Eaton Axle Part Numbers.

1941-47 6 cylinder engine parts are listed as "G" Series in model column.

1947-48 6 cylinder engine parts are listed as "H" Series in model column.

Illustrations throughout this catalogue are for a particular model, however, the basic part numbers are applicable to practically all models.

When ordering parts, always give full part number and name, also specify how shipment is to be made; Freight, Parcel Post, or Express.

Following are brief general telegraphic codes:

ABSEN	Ship via air express.	BEAGA	Post today sure.
ABSIN	Rush by air mail.	BOOBA	Ship fast freight.
ANGRA	Express at once.	BORIK	Ship today sure.
ANILE	Express direct to.	BREWA	Advise how and when shipping.

FORD BASIC PART NUMBERS

Ford basic part numbers are grouped according to their function, for example all parts applying to the rear axle are grouped from 4000 to 4799, transmission from 7000 to 7449, etc.
